Dear Hiring Manager,

I am writing to express my interest in the DevOps Engineer position with your esteemed organization. With over 10 years of experience as a Linux System Administrator and DevOps Engineer, I am confident I can contribute effectively to your team.

My professional journey began as a Graduate Engineer Trainee at HCL Technologies in India. In this role, I honed my skills in Linux system administration and earned my RHCE/RHCSA certification for RHEL 6. After gaining two years of experience, I transitioned to Publicis Sapient, initially as a contractor and later as a permanent employee due to my exceptional performance. During my four years at Sapient, I developed a strong foundation in DevOps practices and advanced my technical expertise.

In 2018, I relocated to Malaysia to join HCL Technologies (Intel) before taking on a role at Sicpa from October 2018 to November 2021. At Sicpa, I worked on several high-impact national and international projects in the Philippines and Switzerland, significantly contributing to the company's CI/CD processes, bash scripting, and Rancher (Kubernetes) deployments. My efforts led to a notable reduction in product completion times.

I am keen to bring my expertise to your team and contribute to your organization's success. I am particularly interested in opportunities in Melbourne, where my husband is based, enabling us to support each other professionally and personally. I possess full working rights in Australia and hold permanent residency, ensuring my readiness to contribute immediately.

Thank you for considering my application. I look forward to discussing how my background, skills, and certifications can benefit your team. Please feel free to contact me at your convenience via phone or email.

Sincerely,
Sheena Arora
